Continuation of Attachment(s) 3. Information Disclosure Statements (PTO/SB/08), Paper No./Mail Date: 03/11/2004; 04/07/2004; 06/17/2005; 04/23/2004; 02/11/2009.

Information Disclosure Statement

A portion of the references cited in the Information Disclosure Statements filed 03/22/2004, 06/17/2005 and 06/23/2008 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 at least because many of the listed publications fail to include all of the items of information listed in 37 CFR 1.98(b)(5). The examiner has not considered, and has lined through, that portion of the Information Disclosure Statements as to the merits.

Applicant is advised that the date of any re-submission of any item of information contained in this Information Disclosure Statement or the submission of any missing elements will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609.05(a).

Allowable Subject Matter

Claims 8-12 and 14-21 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art discloses the following:

- Mitchell et al (US 6,628,304) discloses a GUI that displays hierarchical nodes

Art Unit: 2176

- IBM Redbooks – “Fundamentals of Grid Computing” discloses a grid network and a grid computing environment. Copyright 2002.
- Arning et al (US 2001/0054034) discloses a 3D matrix structure that is used to represent hierarchical relationships between different objects.
- Vaid et al (US 6,502,131) discloses a network monitoring system
- Besaw et al (US 5,276,789) discloses a dynamic and graphical network topology

The prior art fails to disclose every limitation of Claim 8, 16, and 19. More specifically, the prior art fails to disclose or suggest a method implemented in a grid network that includes grid managers, wherein the grid managers manage a service and a resource running the service and wherein the grid managers also include at least a superior and an inferior grid manager, the method comprising:

- Sending a first query from the superior grid manager to the inferior grid managers,
 - the first query including a resource requirement for the resources managed by the grid managers.
- Receiving , at the superior grid manager, in response to the first query, indications of resources managed by the inferior grid managers that meet the resource requirement and are available;
- Providing feedback from the grid managers about the grid network;
- Displaying, based on the feedback, a matrix comprising:

Art Unit: 2176

- Rows corresponding to the grid managers and the services managed by the grid managers,
- Columns representing the resources and having intersections with the rows
- Wherein the intersections between columns and the rows include indications of the services running on the resources.

The examiner notes that these features of the present invention are illustrated in Figure 6 of the Drawings and discussed in detail from Page 3, Line 22 through Page 13, Line 3 in the Specification of the present application.

Regarding Claim 16, the examiner interprets the recited “*grid network*” (see Line 1) to be hardware components of the system, since “a display” (see Line 6) is considered to a CRT or a LCD monitor and is described in detail in Page 15, Lines 8-15. Accordingly, Claim 22 recites statutory subject matter, as defined in 35 U.S.C. 101.

Regarding Claim 19, the examiner interprets the recited “*computer readable storage medium*” to be a hardware component, since the “*computer readable storage medium*” **stores** software components in a hard drive or CD-ROM as described in detail from Page 14, line 10 to Page 15, line 8. Accordingly, Claim 19 recites statutory subject matter, as defined in 35 U.S.C. 101.

Art Unit: 2176

Claims 9-12 and 14-15:

These claims incorporate the allowable subject matter of Claim 8 and are thus allowable.

Claims 17-18:

These claims incorporate the allowable subject matter of Claim 16 and are thus allowable.

Claims 20-21:

These claims incorporate the allowable subject matter of Claim 19 and are thus allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Soumya Dasgupta whose telephone number is 571-272-7432. The examiner can normally be reached on M-Th 9am-7pm, F 9am-1pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Doug Hutton can be reached on 571-272-4137. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
